Attendance matters! Why?

- Research shows that missing 10 percent of school, or about 18 days in most school districts, negatively affects a student's academic performance. That's just two days a month and that's known as chronic absence!!
- Students who attend school regularly are able to learn more, have fewer discipline problems, develop better study habits and often are more successful than students who do not.
- When students improve their attendance rates, they improve their academic prospects and chances for graduating.

It is really
important that you
are here at Wa-Hi
when you are
feeling well!
